

**Designation:** F 1919 – 03

# Standard Specification for Griddles, Single and Double Sided, Self-heating, Counter or Stand Mounted Gas and Electric Fired<sup>1</sup>

This standard is issued under the fixed designation F 1919; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon  $(\epsilon)$  indicates an editorial change since the last revision or reapproval.

## 1. Scope

- 1.1 This specification covers griddles which utilize gas or electrical heat sources, or both, for cooking food in the commercial and institutional food service establishments.
- 1.2 The values stated in inch-pound units are to be regarded as the standard. The SI values given in parentheses are provided for information only.
- 1.3 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

# 3. Terminology

- 3.1 Definitions of Terms Specific to This Standard:
- 3.1.1 *griddle*, *n*—as used in this specification, is a device for cooking food by direct contact with a hot surface.

#### 4. Classification

- 4.1 Griddles covered by this specification are classified by type, size, style, and electrical class.
  - 4.1.1 *Type*:
  - 4.1.1.1 *Type 1*, for counter top use.
- 4.1.1.2 *Type 2*, stand mounted, including, stand with plain legs, stand with casters, or stand with bolt-down legs.
  - 4.1.1.3 *Type 3*, for flush installation (drop-in type).
  - 4.1.2 *Size* (Cooking Surface):
- 4.1.2.1 Nominal 24-in. (610-mm) wide by 18-in. (457-mm) deep.
- 4.1.2.2 Nominal 24-in. (610-mm) wide by 24-in. (610-mm) deep.

 $<sup>^{\</sup>rm I}$  This specification is under the jurisdiction of ASTM Committee F26 on Food Service Equipment and is the direct responsibility of Subcommittee F26.02 on Cooking and Warming Equipment.

Current edition approved Sept. 10, 2003. Published Sept. 2003. Originally approved in 1998. Last previous edition approved in 1998 as F 1919 – 98.

- 4.1.2.3 Nominal 36-in. (914-mm) wide by 18-in. (457-mm) deep.
- 4.1.2.4 Nominal 36-in. (914-mm) wide by 24-in. (610-mm) deep.
- 4.1.2.5 Nominal 72-in. (1829-mm) wide by 24-in. (610-mm) deep.
- 4.1.2.6 Nominal 48-in. (1219-mm) wide by 24-in. (610-mm) deep.
- 4.1.2.7 This specification does not purport to address all of the sizes, which may be available, but it is an overview of the most common sizes used in the industry today.
  - 4.1.3 *Styles*:
  - 4.1.3.1 Style 1—Gas-fired griddle.
  - 4.1.3.2 Style 2—Electric griddle.
  - 4.1.3.3 Style 3—Combination gas-fired/electric griddle.
  - 4.1.4 Electrical Classes:
  - 4.1.4.1 *Class 1*—208 V, 60 Hz, 1 phase.
  - 4.1.4.2 Class 2-208 V, 60 Hz, 3 phase.
  - 4.1.4.3 Class 3—240 V, 60 Hz, 1 phase.
  - 4.1.4.4 Class 4-240 V, 60 Hz, 3 phase.
  - 4.1.4.5 Class 5-480 V, 60 Hz, 3 phase.

## 5. Ordering Information

- 5.1 An order for a griddle(s) under this specification shall specify the following:
  - 5.1.1 ASTM specification number and date of issue.
  - 5.1.2 Quantity to be furnished.
  - 5.1.3 Type.
  - 5.1.4 Size.
  - 5.1.5 Style.
  - 5.1.6 Electrical Class.
- 5.2 The following options should be reviewed, and if any are desired, they also should be included in the order.
- 5.2.1 When Federal/military procurement(s) is involved, refer to the Supplementary Requirements section at the end of this specification.
- 5.2.2 Type of gas, if applicable, that is, natural, propane, or other (specify BTU/ft<sup>3</sup>).
- 5.2.3 Electrical power supply characteristics, including controls if applicable, such as voltage, frequency, phase, kw input, or amp load, as applicable.
- 5.2.4 When other than manufacturer's standard, commercial, domestic packaging is required, specify packaging requirements (see 13.1).
- 5.2.5 When special or supplement requirements, such as inspections, accessories, mounting patterns, utility connections, etc., or combination thereof, are required.
- 5.2.6 When specified, a certification to ensure that samples representing each lot have been either tested or inspected as directed and the requirements have been met. When specified, a copy of the certification or test results, or both, shall be furnished to the purchaser.
- 5.2.7 When specified, with a quick-disconnect gas supply. When specified an approved quick disconnect (socket and plug) conforming to ANSI Z21.41, and a flexible metal connector conforming to ANSI Z21.45 and consisting of a male pipe thread fitting on one end and a union with female thread on the opposite end shall be provided with the griddle.

5.2.8 Specify the location of the grease trough(s), type of drainage and splash guards.

## 6. Materials

- 6.1 General—Griddles shall conform to the applicable documents listed in Section 2. Materials used shall be free from defects, which would affect the performance or maintainability of individual components or of the overall assembly. Materials not specified herein shall be of the same quality used for the intended purpose in commercial practice. Unless otherwise specified herein, all equipment, material, and articles incorporated in the work covered by this specification are to be new or fabricated using materials produced from recovered materials to the maximum extent possible without jeopardizing the intended use. None of the above shall be interpreted to mean that the use of used or rebuilt products are allowed under this specification unless otherwise specified.
- 6.2 Hardware and Fittings—Unless otherwise specified (see Section 5), all hardware and fittings shall be corrosion-resistant or suitably processed to resist corrosion in accordance with the manufacturer's standard practice.
- 6.3 *Threaded Parts* All threaded parts shall conform to ANSI B1.1.

#### 7. Design and Construction

- 7.1 *General*—Griddles and accessories shall conform to ANSI/UL No. 197 or ANSI Z83.11, as applicable, and ANSI/NSF 4, ANSI/NFPA 54 and ANSI Z223/NFPA 70, as applicable. Griddles shall be delivered assembled, ready for connection to electricity or gas piping, or both, as applicable.
- 7.2 Service Connections—Provisions for service shall be provided in the back or bottom of the griddle. Types 1 and 2 shall be capable of being banked side by side.
- 7.3 *Electrical Characteristics*—All electric griddles shall be designed for operation on nominal voltage ratings, Hz, and phases as specified by electrical class.
- 7.4 *Griddle Surface*—The griddle surface shall not be porous, pitted, cracked, or distorted.
- 7.5 Controls—The temperature of each griddle section shall be controlled by a temperature regulating device or thermostat. If switches and thermostats are located on the front panel, they shall be recessed or otherwise protected from inadvertent changes or damage. The temperature controlling device or thermostat shall be calibrated to maintain the surface temperature tolerance on each section not more than 25°F (13.9°C) except for those areas adjacent to the splash guards, the surface temperature tolerance shall not vary more than 30°F (16.7°C).
- 7.6 Heating Elements—The electric griddles shall have heating elements arranged so that different areas of the griddle may be controlled independently. A minimum of one heating element shall be furnished for each linear foot (305 mm) of the griddle plate. The elements shall be the enclosed coil type and shall be attached securely to the bottom of the griddle plate. The bottom of the heating elements shall be enclosed by a heat insulating pad or by a system of heat-reflecting baffles. Both methods shall be designed to isolate the heating elements by reducing the amount of heat radiated downwards. When an insulating pad is used, it shall be fire resistant and suitable for the temperatures generated in this area. Heating elements shall

be accessible readily for repair or replacement. The terminals of the heating elements shall project a sufficient distance to permit easy access to the connections. All internal wiring shall be free of stress or tension and, where required, shall be coated with high-heat resistant insulation to resist water or grease.

7.7 Fuel System for Gas Griddles—The gas griddles shall be designed to operate on natural gas or propane. When specified (see 5.2.2) a separately furnished conversion kit shall be supplied.

7.8 Griddle Stand-Design and Construction—Griddle stands for Type 2 griddles shall be of open type design, so constructed that they can be banked together in battery alignment without space between the tops. Means shall be included to secure the griddle to the stand to allow removal of the griddle. Stands shall be as specified in 4.1.1.2, with plain legs, casters or bolt-down legs. Type 2B griddle stands shall be provided with four casters, two rear casters shall be rigid type and two front casters shall be swivel type; or, when specified (see 5.2), four rigid or swivel casters. The swivel type front casters shall be provided with brakes.

7.9 *Proof of Compliance*—Evidence of complying with ANSI/UL 197 or ANSI Z83.11, and ANSI/NSF 4 shall be a listing in a third party certification agency listing book, or a certified test report from a nationally recognized testing laboratory acceptable to the purchaser or appropriate labels attached.

## 8. Performance Requirements

8.1 *Performance Testing*—When specified in the contract or purchase order, performance testing shall be performed in accordance with Test Methods F 1275.

## 9. Sampling and Quality Assurance

- 9.1 Sampling—When specified in the contract or purchase order, sampling for the inspection and tests contained in the main body of this specification shall be performed in accordance with ANSI Z1.4.
- 9.2 The griddles prepared for shipment shall be measured and inspected by the manufacturer for compliance with this specification.

#### 10. Testing Methods

- 10.1 Thermostat Test:
- 10.1.1 Significance and Use—This test method determines compliance with 7.5 and 8.1 surface temperature variances from the thermostat setting requirements.

10.1.2 The griddle shall be connected to the specified power source. The thermostat shall be set at 300°F (149°C) and the griddle allowed to operate until the temperature control has cycled "on" and "off" through at least three cycles at this setting. The griddle surface then shall have five temperature readings taken per heating section. The readings shall be taken 4 in. (102 mm) in from each corner and at the center of the heating section, that is, at the intersection of the diagonals from corner to corner of each heating section. The heating section surface temperature shall be measured at each of the five points. The high temperature at each point and the low temperature at each point shall be calculated. These temperatures shall conform to the tolerances specified in 7.5. This procedure shall be repeated at 325°F (163°C) and 350°F (177°C).

#### 11. Product Marking

11.1 Each griddle shall be provided with an identification plate in compliance with ANSI/Z83.11 or ANSI/UL 197.

#### 12. Manuals

12.1 Format and content of applicable manuals shall be as indicated in Specification F 760.

# 13. Packing and Package Marking

13.1 The complete griddle shall be packaged and packed in accordance with the manufacturer's standard commercial domestic packaging. The package shall be marked showing the name of the product, model number, serial number and manufacturer's name. When specified, packaging shall be in accordance with the requirements of Specification D 3951.

## 14. Keywords

14.1 cooking device; counter top mounted; drop-in type; food service equipment; griddle; stand mounted

## SUPPLEMENTARY REQUIREMENTS

- S1.1 Where provisions of this supplement conflict with the main body, this supplement shall prevail.
- S2.1 *Manual*—A manual complying with Specification F 760 and these Supplementary Requirements shall be provided.
- S3.1 First Article Inspection—When required, the first article inspection shall be performed on one unit. The first article may be either a first production item or a standard production item from the supplier's current inventory, provided the item meets the requirements of the specification and is representative of the design, construction, and manufacturing technique applicable to the remaining items to be furnished under the contract.
- S4.1 *Data Nameplate*—A nameplate shall contain the following information:
  - S4.1.1 National Stock Number (NSN).
  - S4.1.2 Government approved manual number.
- S5.1 Part Identifying Number—The following part identifying numbering procedure is for government purposes and does not constitute a requirement for the contractor. These classes are the same as those in Section 4. The PINs to be used for items acquired to this specification are as follows:

ASTMF 1919 <u>2 C 2 A</u>

Specification No.

Type \_\_\_\_\_\_
Size \_\_\_\_\_
Style \_\_\_\_\_
Electrical Class \_\_\_\_\_

Type 1 —For Counter Top Use
Type 2A—Stand Mounted with Plain Legs

2B—Stand Mounted with Casters
2C—Stand Mounted with Bolt-Down Legs

Type 3 —For Flush Installation into Dresser Top

- S5.1.1 Size of Cooking Surface:
- S5.1.1.1 Size A—Nominal 18 in. (457 mm) deep by 36 in. (914 mm) wide.
- S5.1.1.2 Size B—Nominal 18 in. (457 mm) deep by 24 in. (610 mm) wide.
- S5.1.1.3 Size C—Nominal 24 in. (610 mm) deep by 24 in. (610 mm) wide.
- S5.1.1.4 Size D—Nominal 24 in. (610 mm) deep by 36 in. (914 mm) wide.
- S5.1.1.5 Size E—Nominal 24 in. (610 mm) deep by 48 in. (1219 mm) wide.
- S5.1.1.6 Size F—Nominal 24 in. (610 mm) deep by 72 in. (1829 mm) wide.
  - S5.1.2 Styles:
  - S5.1.2.1 Style 1—Gas-Fired Griddle.
  - S5.1.2.2 Style 2—Electric Griddle.
  - S5.1.3 Electrical Classes:
  - S5.1.3.1 Electrical Class 1—208 V, 60 Hz, 1 phase.
  - S5.1.3.2 Electrical Class 2—208 V, 60 Hz, 3 phase.
  - S5.1.3.3 Electrical Class 3—220 V, 60 Hz, 3 phase.

- S5.1.3.4 Electrical Class 4—220 V, 50 Hz, 1 phase.
- S5.1.3.5 Electrical Class 5—220 V, 50 Hz, 3 phase.
- S5.1.3.6 Electrical Class 6—380 V, 50 Hz, 3 phase.
- S5.1.3.7 Electrical Class 7—440 V, 60 Hz, 3 phase (ship-board use).
- S6.1 Preservation, Packaging, and Package Marking—When other than normal commercial practice or conformance to Specification D 3951 is desired, the preservation, packaging, and package marking requirements shall be stated in the purchase order or contract.
  - S7.1 Naval Shipboard Requirements:
- S7.1.1 *Electromagnetic Compatibility*—When specified, electric griddles shall be designed and equipped for electromagnetic compatibility. The contractor shall furnish written certification that the equipment meets the emission and susceptibility requirements when tested in accordance with test methods of MIL-STD-461.
- S7.1.2 *Inclined Operation*—When specified, the units shall operate satisfactorily, along with no spillage of grease or product, when the griddle is inclined for 30 s at an angle of 15° each side of the vertical in each of two vertical planes at right angles to each other. This test shall be run for 30 complete cycles in each of the two vertical planes.
- S7.1.3 Environmental Suitability—Griddles shall be capable of withstanding ship's vibration and motion. When specified, the unit, under normal operating conditions, shall be tested in accordance with MIL-STD-167/1, Type 1 equipment. The unit shall be secured to the test machine in the same manner that it will be secured on board ship. The unit shall operate without malfunction.
- S7.1.4 *Access*—Unless otherwise specified, units for naval surface vessels shall pass through a 26-in. (66-cm) wide shipboard hatch without major disassembly. Equipment for submarines shall pass through a 25-in. (64-cm) diameter circular hatch without major disassembly.
- S7.1.5 *Power*—Unless otherwise specified, equipment shall be supplied in 440 V, 60 Hz, 3 phase, 3 wire ungrounded system in accordance with MIL-STD-1399/300.
- S7.1.6 *High Voltage Label*—On equipment rated 440 VAC or higher, a "Danger High Voltage" label shall be affixed to the equipment outer case assembly, on or adjacent to each service access cover adjacent to one of the fasteners which secure the cover. The warning label also shall be placed near the high voltage components inside the equipment. The label shall include, but is not limited to, the following warnings:
  - S7.1.6.1 A warning of high voltage.
- S7.1.6.2 The power supply must be disconnected before servicing.
  - S7.1.6.3 Access covers must be in place during use.
  - S7.1.6.4 Service should be done by authorized personnel.
- S7.1.7 *Human Factors Criteria*—Human factors engineering criteria principles, and practices, as defined in Specification F 1166, shall be used in the design.

- S7.1.8 *Instruction Plate*—An instruction plate shall include instruction for startup, operation and shutdown.
- S7.1.9 *Manufacturer's Certification*—If the manufacturer has successfully furnished the same equipment on a previous contract within the past three years further inspection will not be required. The manufacturer shall certify in writing that the equipment to be furnished is the same as that previously furnished and approved, and that no major design changes have been made to the equipment.
- S7.1.10 *Wiring*—Suitable shields or baffles shall be installed to prevent wiring from hanging into any areas where personnel or removable parts, such as grease drawers, can contact them.
- S7.1.11 *Mounting*—Griddles to be used in shipboard applications should be provided with means to securely mount to deck or dresser top. Type 3, drop-in griddles, shall be equipped with mounting flange, top support frame with securing clamps, and sealing gaskets. Means shall be provided to prevent grease penetration to the underside.
- S7.1.12 Grease Trough, Chutes, and Receptacle Drawers—Shipboard griddles shall have grease chutes that lead only from the front grease trough to the spillage receptacle drawer so grease and debris collect in the front of the receptacle drawer first. Grease receptacle drawers shall be provided with a positive latch to prevent opening and spillage.

ASTM International takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in this standard. Users of this standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility.

This standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of this standard or for additional standards and should be addressed to ASTM International Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, at the address shown below.

This standard is copyrighted by ASTM International, 100 Barr Harbor Drive, PO Box C700, West Conshohocken, PA 19428-2959, United States. Individual reprints (single or multiple copies) of this standard may be obtained by contacting ASTM at the above address or at 610-832-9585 (phone), 610-832-9555 (fax), or service@astm.org (e-mail); or through the ASTM website (www.astm.org).
